

Information Sign „Gasalarm“

Information Sign „Gasalarm“

Quick and clear warning in case of gas hazard

The gas alarm Sign was specially developed to provide quick orientation and clear instructions for action in potentially hazardous environments. The striking yellow and black design ensures that the Sign is immediately noticeable even from a distance or in rooms with reduced visibility.

Features

The „Gasalarm“ Sign provides an unambiguous warning of the imminent danger of suffocation or poisoning due to gas leaks. The text printed on the Sign clearly and directly indicates the necessary steps to take in an emergency: leave the room immediately, warn other people and ventilate the affected areas.

It contributes significantly to increasing occupational safety and ensures that no valuable time is lost in an emergency.

Technische Daten
