

# LED Warning Sign Gas Alarm (Wall Mounting)

with integrated switchable piezo sounder

## LED Warning Sign

Ideal for wall mounting in all rooms and corridor areas

The LED panel serves as a visual warning for gas hazards. In the event of an alarm, your chosen text and the pictogram will flash. Additionally, the warning sign features an integrated piezo buzzer which can operate either simultaneously with the LED or separately. It can be installed both in the hazardous area and above the access doors, to warn staff not to enter. The warning sign is usually controlled via a potential-free relay contact within the gas warning control panel.

### Technical Data

Power supply	24 V DC (220-240 V 50 Hz available on request)
Power Consumption	5 W (15 W on 220/ 240 V 50 Hz)
Illuminant	LED (Intermittent or continuous operation can be set)
Sounder	Piezo sounder with LED, switchable to operate separately or simultaneously with the LED display
Illuminant Service Life	Ca. 50.000 h
Housing	White polycarbonate
protection class	IP 65
Weight	Ca. 1.000 g
Dimensions	H 182 x W 332 x D 75 mm
CE-marking	According to EMC and low-voltage directive
Connecting cable	Control cable 3X1mm <sup>2</sup> , PVC, cable identification: numbers, flexible, protective conductor: No
Connection	3-terminal connection strip
Optional	With mounted cable gland Ø 16 Clamping range: 4-7 mm
